AUTHOR INDEX FOR VOLUME 3	603

Information for Contributors

Brain and Language publishes original research articles, case histories, critical reviews and scholarly notes; each contribution will be concerned with human language or communication (speech, hearing, reading, writing, or non-verbal modalities) related to any aspect of the brain or brain function. Each will have theoretical import, either formulating new hypotheses, or supporting or refuting new or previously established ones. The interdisciplinary focus includes the fields of neurology, linguistics, neurophysiology, psychology, neuroanatomy, psychiatry, neurosurgery and speech pathology. *Brain and Language* will accept material that has not been published elsewhere and that is not currently under review by other publications. Manuscripts of several different types are solicited: regular articles, single or multiple case history studies, critical reviews of books of interest to the journal's readership, and short (limited to under 10 pages typed) scholarly notes and comments discussing issues of topical interest.

Manuscripts should be submitted to either:

Editor: Harry A. Whitaker, Ph.D.
Department of Psychology
University of Rochester
Rochester, New York 14627

Associate Editor: Alan B. Rubens, M.D.
Chief, Aphasia Center,
Hennepin County Medical Center
701 Park Avenue South
Minneapolis, Minnesota 55415

Form of Manuscript. Authors should submit manuscripts in *triplicate* (one original and two copies), typewritten, double-spaced on one side of 8.5 × 11 in. white paper. The original and two copies of all artwork, tabular material, photographs, etc. must also be included. All pages should be numbered consecutively.

Page 1 should contain the article title, author(s) name(s) and affiliation(s), abbreviated form of the title for the running page heading (not to exceed 35 characters including letters and spaces) and the complete mailing address of the author to whom all correspondence should be sent. *Page 2* should contain a short *abstract* of approximately 100 words.

Papers must be written in English. Language data may be given in English when clearly identifiable, otherwise should be transcribed into the phonetic alphabet of the International Phonetic Association (IPA).

Figures should be numbered in order of appearance (with Arabic numerals) and should have short descriptive captions (typed double-spaced on a separate page). Line drawings must be originals in black India ink on white paper, on polyester drafting film, or comparable glossy black and white photographs. Lettering should be uniform, professionally done, and large enough to be fully legible after a 50–60% reduction in printing.

Tables should be numbered in order of appearance (with Arabic numerals); they should be typed double-spaced on a separate page. Each table should have a short descriptive title typed (double-spaced) above the table. Footnotes to tables (indicated by superscript lower case letters, ^{a,b}, etc.) should be typed (double-spaced) at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes to the text should be kept to a minimum; when necessary, they should be indicated by superscript Arabic numerals, ^{1,2}, etc., cited consecutively throughout the article starting with the title. They should be typed double-spaced on a separate page.

References should be cited in the text by surname of the author and the publication date in parentheses, e.g., Goldstein (1948) or (Russell and Espir, 1961). If more than one paper was published by the same author in a given year, the correct style is Broca (1861a) or (Broca, 1861b).

References should be listed alphabetically, typed double-spaced at the end of the article. All references cited in the text must be listed at the end of the paper. Journal titles should be written out in full, not abbreviated. Note the following examples.

Allison, R. S. 1962. *The Senile Brain*. London: Edward Arnold.

Koh, S. D., Vernon, M., & Bailey, W. 1971. Free-recall learning of word lists by prelingual deaf subjects. *Journal of Verbal Learning and Verbal Behavior*, **10**, 542-547.

Luria, A. R., & Tsvetkova, L. S. 1970. The mechanism of "dynamic aphasia." In M. Bierwisch & K. E. Heidolph (Eds.) *Progress in Linguistics*. The Hague: Mouton. Pp. 187-197.

(Use underlining for journal and book titles only.)

Proofs. Galley proofs will be sent to the designated author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty (50) reprints without covers will be provided free of charge for articles. Additional reprints may be purchased; an order form will be included with proofs.
